1. INTRODUCTION

This bibliographic search was prepared by BRIDGE for the Danish Ministry of Foreign Affairs (DANIDA). The bibliography is intended as background information for a gender profile of Nicaragua focused on the sectors; health; agriculture; transport and infrastructure environment; democratic development; and legal status.

The database searched was the British Library of Development Studies, with some additional references from other sources.

This bibliography was compiled by Zoë Oxaal for BRIDGE at IDS. Sally Baden provided advice. This bibliography is not fully comprehensive, but covers relevant materials which could be identified within the time frame allowed. The entries are ordered under headings as listed in the table of contents. The entries vary in format due to the different sources searched. For sectors in which scant literature directly addressing the topic was found, references likely to cover relevant issues have been included¹. Section 7 is comprised of other references collected in the course of the search, but does not attempt to be comprehensive in its coverage.

¹particularly in sections 3 and 4

2. HEALTH

Encuesta sobre Salud Familiar Nicaragua, 92-93 : informe final.
